

## DECLARATION THE PREVENTION OF MAJOR ACCIDENTS

Dormer Pramet is a modern global company with an integrated management system in place.

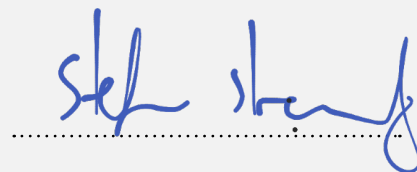

The main goal in preventing major and serious accidents is to lower as much as possible all risks leading up to serious accidents, which affect the lives and health of employees as well as local residents and have an impact on property and the environment. The main goal for accidents that have already occurred is to limit their aftermath as much as possible.

Dormer Pramet management has committing to maintain the following in order to fulfil these goals

### PRINCIPLES MAJOR AND SERIOUS ACCIDENT PREVENTION

- to ensure the protection of the health and safety of employees during work, to maintain fire safety principles as well as principles for the protection of the environment especially through prevention
- to comply with all relevant legal regulations so that the risk of emergency situations is minimal and so that prevention major and serious accidents is increased
- to create an environment for safe manipulation with chemical substances and compounds by providing all the corresponding technical, technological and human resources
- to constantly evaluate the level of security in the company
- to support the constant improvement of the process for the prevention major and serious accidents by checking the workplace and working processes, management systems and remedial measures, by complying with legal obligations and using internal as well as external audits
- to constantly support communication between the company's employees as well as other involved parties
- to use all available scientific and technological advancements to continue to improve all processes
