New products 2025

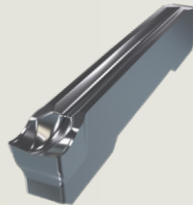

Productivity redefined for high-performance turning

The new T5415 grade and KM chipbreaker deliver unmatched stability, wear resistance, and productivity, setting a new standard for efficient nodular cast iron turning.

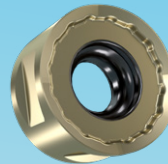

Versatility with economy in every cut

The STD shoulder milling series delivers versatile, cost-efficient performance with triangular inserts, specialized geometries, and up to 11 mm depth of cut.

Polished precision GL. S-PM inserts for P&G ISO N materials

The new GL. S-PM inserts are perfect for parting-off and grooving non-ferrous materials and titanium alloys, offering smooth chip control.

Maximize efficiency while reducing cost per piece

SRN offers double-sided inserts with eight edges, ensuring efficient, smooth, and precise performance in demanding machining tasks.
